SHAMSAD RAHMAN

Tempe, AZ | +1-765-631-0481 | srahma20@asu.edu | linkedin.com/in/shamsadr

SUMMARY

Industrial Engineering graduate and MSIE candidate at ASU. Specialized in revenue optimization, business intelligence, and autonomous systems. Proven track record in leveraging SQL, Python, and R to improve forecast accuracy by 15% and automate aerospace data workflows by 50%.

EDUCATION

Arizona State University, Ira A. Fulton Schools of Engineering — *Expected May 2027*
Master of Science in Industrial Engineering — *Tempe, AZ*

Purdue University, Edwardson School of Industrial Engineering — *Aug 2019 – May 2024*
Bachelor of Science in Industrial Engineering — *West Lafayette, IN*

PROFESSIONAL EXPERIENCE

Assurance Hospitality Management — *Nov 2024 – Jul 2025*
Revenue Analyst — *Salt Lake City, UT*

- Developed rolling 30/60/90-day demand forecasts, improving forecast accuracy by 15%.
- Optimized daily pricing and inventory controls, raising RevPAR by 5% and improving RGI by +2 points.
- Conducted displacement analyses on group RFPs worth $16M to protect yield during peak demand.

Hupp Aerospace and Defense — *Jan 2024 – May 2024*
Business Intelligence Analyst (Senior Design) — *New Haven, IN*

- Integrated Quantum ERP, Tableau, and Wrike to automate workflows and reduce manual entry by 50%.
- Built Tableau QA dashboards, increasing product visibility by 25% and cutting overhead by 30%.
- Developed SOPs and training videos to ensure system interoperability and reduce learning curves.

PROJECT EXPERIENCE

Autonomous AI Agent (Langflow) — *Sep 2024 – Nov 2024*
Independent Developer

- Engineered a ReAct and Reflection-based AI agent using Langflow to manage complex, multi-step contextual queries.
- Implemented iterative error analysis to refine agent performance and response accuracy.

Purdue Vertically Integrated Projects (ORSOL) — *Jan 2023 – May 2023*
Undergraduate Researcher — *West Lafayette, IN*

- Optimized EV charging station placement using SAS and Data Envelopment Analysis (DEA).
- Integrated demand and cost factors into simulation models to support strategic infrastructure decisions.

SKILLS

Technical: SQL, Python, SAS, R, Langflow, Tableau, Power BI, Excel (Advanced), Financial Modeling
Methodologies: Operations Research, Demand Forecasting, AI Agent Architectures, DEA, Stochastic Modeling
Soft Skills: Stakeholder Management, Cross-functional Collaboration, Strategic Problem Solving
